KWP knows how important your home is to you.

Engineered Wood Core

Our product is specifically engineered with an increased density profile surface to withstand impact. Our product meets the stringent CARB emission standards.

Advanced Binder Technology / No Zinc Borate

Zinc borate is not used in our products. Instead, a proprietary advanced resin system is used, which creates a high performance resistance to water, weather, termites and fungal decay.

NO Resin Saturated Overlay Used

With an overlay you run the risk of delamination of your siding. We use an in-line pre-sealer that is an excellent barrier to the elements and eliminates the chance of delamination.

Array of Colors

Available in an array of colors, engineered wood siding and trim offer tremendous design flexibility for today's designers and architects as well as pairing our products.
